air travel, deep vein thrombosis and 380
aircraft disinsection 900–901
albendazole, school-based therapy against anaemia 695–703
alcohol
  globalization of control measures 842–849
  intake, European adolescents 380
Algeria, coeliac disease in refugee children 541–545
Alzheimer disease, lifestyle and 378
Amblyomma americanum (Lone Star tick), Lyme disease transmission 916–925
amblyopia, refractive error-related 237–243
American cutaneous leishmaniasis, skin test 1169
Americas, homicide in children and adolescents 2–7, 172
anaemia
  inherited haemoglobin disorders 704–712
  prevalence estimation 506–511
  school-based anthelmintic therapy 695–703
antenatal clinics
  malaria treatment 1014–1023
  preventing mother-to-child transmission of HIV-1 641–647
  seroprevalence data for modelling HIV/AIDS epidemics 596–607
anthelmintics, school-based therapy against anaemia 695–703
anthrax bioterror attack 1089
antibiotics
  discovery of penicillin 778–790
  for febrile children in Bangladesh 1096–1105
  improving prescribing, in Viet Nam 313–320
  see also azithromycin
antibody response
  measles vaccine 1038–1046
  yellow fever vaccine 1056
  see also serological surveys
anticonvulsants, availability in developing countries 344–351
antimalarial drugs
  development, public–private partnerships 728–734
  home treatment of children 1014–1023
  intermittent therapy 688
  new combination 380
  prepackaged 394–399
antiretroviral therapy
  directly observed therapy with highly active (DOT-HAART), in advanced HIV disease 1145–1151, 1152–1155
  drug price reductions 377–378
  increasing HIV resistance 688–689
  to prevent mother-to-child transmission of HIV 1138–1144
antitubercular drugs
  development, public–private partnerships 728–734
  fixed-dose combination tablets 61–68
  price reductions for poor countries 904–905
Aravind Eye Hospital, Madurai, India 270–271
arsenic levels, in water 581
Asia
  AIDS crisis 1000
  Central, Health InterNetwork initiative 81
asthma, in developing countries 971–979
Australia
  acute flaccid paralysis surveillance 1169–1170
  burden of disease and injury 1076–1084
  measles control campaign, 1998 882–888
autism, MMR vaccine and 272, 581
autopsy data
  in Mozambique 546–552
  verbal, maternal deaths 805–810
azithromycin, for trachoma control
  distribution by volunteers in Ghana 8–14
  targeted household treatment versus mass treatment of children 201–207
  two distribution strategies in Nepal 194–200
  versus topical tetracycline 632–640

bacterial infections, diagnosis and management in Bangladeshi children 1096–1105
Balkans war zone, health risks 274
Bangladesh
  chemical pollution from tanneries 78–79
  client satisfaction and quality of health care 512–517
  fever module in WHO/UNICEF guidelines for IMCI 1096–1105
  hypertension in elderly 490–500
  immunization coverage 501–505
